

Family Safe-Word Builder

VoiceShield Protocol™ — Worksheet

Family Safe-Word Builder

Time: 10 minutes. Do this WITH your family, in person.

Step 1 — Choose the Safe Word

Rules: - **Never** posted online, texted, or spoken into voicemail - Not a pet name, birthday, or address (all public info) - Memorable enough that a 75-year-old remembers it in a panic - Two random words beat one predictable word

❌ Avoid	✅ Good examples
Max (dog's name)	pineapple umbrella
1954 (birth year)	Uncle Roy's hat
Smith (last name)	sideways Tuesday
Our street name	blue mug

Our safe word is: _____

Our backup (in case someone forgets):

Backup options: a second word, OR a physical object (“the blue mug in the kitchen”), OR a shared memory (“the town where we got engaged”).

Step 2 — Choose 3 Bait Questions

Only real family knows these. Write questions whose answers are: - NOT on social media - NOT guessable from public records - Stable over time (not “what did you eat yesterday”)

Bait Q1: _____ **Answer:** _____

Bait Q2: _____ **Answer:** _____

Bait Q3: _____ **Answer:** _____

Step 3 — Agree the Hang-Up Script (word for word)

Everyone reads this aloud and agrees:

"I need to verify this. I'm hanging up and calling you back on your number. If this is really you, you'll answer. If it's not — goodbye."

Signed by all participating family members:

Name	Signature / Initials	Date

Step 4 — Create the Family Group

- App: _____ (WhatsApp / Signal / iMessage / Telegram)
- Group name (innocuous): _____
- Rule: **any money request by voice → post in the group within 60 seconds**

Step 5 — The Drill (this week)

Run it once. It takes 3 minutes and it's the difference between a spreadsheet and a reflex.

1. Pick a family member to play the "scammer."
2. They call another member, doing their best panicked clone impression: *"I'm in jail, I need bail money, don't tell anyone!"*
3. The receiver must: ask for the safe word → ask a bait question → if failed, deliver the Hang-Up Script → post in the family group.
4. Swap roles. Laugh about it. Do it again in 6 months.

Keep This Sheet

Print it. Put it in a drawer (not on the fridge — the safe word shouldn't be visible to visitors). The checklist goes on the fridge; this stays private.
